DETAILED ACTION

Claims 1-16 are presented for examination.

Allowable Claims

Claims 1-16 are allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The present invention pertains to a method and system for preventing overwrite errors in a buffer system. The claimed invention (claim 1 as an example of the broader claim) recites features such as " ...performing a data write to a predefined memory segment; after said write, comparing a redundant portion at the end of said segment to an initial header portion of said segment; if said comparing indicates that said redundant portion and said initial portion are not the same, signaling an overwrite error."

The prior arts of record (Natrsevski et al. U.S. Patent No. 5,475,820 as an example of such prior arts) teach a system including a processing element that stores write management information identifying which sectors have been written and which sectors are available to be written. Whenever the drive receives a write command, it checks the write management directory to determine if the sector has already been written. If the directory indicates that the sector has already been written, the drive returns an error, otherwise, the drive writes the sector and updates the write management directory. If the sector address has been previously written, it returns an

overwrite error. The prior arts however, fail to teach "after said write, comparing a redundant portion at the end of said segment to an initial header portion of said segment; if said comparing indicates that said redundant portion and said initial portion are not the same, signaling an overwrite error".

As such, modification of the prior arts of record can only be motivated by hindsight reasoning, or by changing the intended use and function of the prior art themselves. It is therefore not clear that one of ordinary skill in the art at the time of the invention would have made the necessary modifications to the prior art of record to encompass the limitations set forth in the present application. Moreover, the prior arts of record, taken either alone or in combination, do not anticipate nor render obvious the claimed inventions. Hence, claims 1-16 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
